

## Crime Data In Atlantic City, New Jersey

### **Introduction**

#### Description of the Problem:

You just got a job in Atlantic City, New Jersey and you and your family are getting ready to move, but you are concerned about your family's safety. Which neighborhood in this city would be the safest for you and your family? Primarily, which neighborhood has the lowest amount of crime?

As of 2019, Atlantic City has a population of about 38,000 people. This population is split among 14 Neighborhoods, and each neighborhood has their own crime rate. We would want to find a way to compile the individual crime rates of each of the 14 neighborhoods to determine the safest of them all. This data would also be useful for the city if they were to decide to build a new school and are considering the safest possible location.
